

Mustang Park Homeowners Association now has Flock Safety, a neighborhood safety company with license plate reading cameras. The cameras capture footage of vehicles and securely stores them in the cloud.

In the event of crime like car break-ins or home burglaries, license plate information is the #1 piece of evidence police request. We look forward to this added layer of protection coming to our neighborhood.

With our new system, Flock Safety enables our residents with the ability to add their vehicle details to the system through a feature called the Safelist. This allows your car to be marked as a "resident", so if a crime occurs we can quickly filter out our community members.

To register for the Flock Safety Safelist, please visit
